

Results Harmony strawberries Growing season 2017

In the Netherlands, the ever bearing strawberry variety Harmony grown on table tops was sprayed four times with the GOOD FOR GREENS® plant growth regulator. The strawberries were handpicked and the quantities of treated and control strawberries were recorded by the grower.

As shown in graph 4, the overall yield of the treated plants (rows 1 – 17) during 10 weeks of production was 14% higher. During the first 7 weeks thereof, overall yield was 25% higher and during the first 3 weeks a staggering 40% higher yield was recorded compared to the control plants (rows 18- 35).

Conclusion: The GOOD FOR GREENS® plant growth regulator increases the yield of Harmony strawberries by 14%.
